IS ETHICS HOLDING BACK THE EU IN THE AI ARMS RACE?

Europe neither championing AI development nor its application is dealing with elemental questions being the first to publish the Ethics guidelines for trustworthy AI. Together with you, we want to investigate this topic and discuss potential strategies for Europe to strive to the forefront while remaining true to its principles.

We thank the **Chair for International Relations (Prof. Dr. Tim Büthe)** for Co-Sponsoring this event.

9 December 2019, 19:15
Hochschule für Politik München
Richard-Wagner-Str. 1

Your panel speakers

Florian von Keller, ThinkTech

Together with The NGO ThinkTech, Florian gives students a platform to work on topics regarding the impact of AI and new digital developments on our society.

Lucas Spreiter, Unetiq

Lucas is rethinking Engineering with AI at Unetiq, a Munich AI Start-Up that he co-founded. On top of that, he is hosting the event series „AI Fails explained."

Antonio Bikić, Munich Center for Ethics

Antonio currently pursues his Ph.D. at the interface of AI, Philosophy of Mind and Ethics at LMU (Philosophy/Ethics) and ETH Zurich (ML), making him a true expert.

Jennifer Kaiser, Junge Liberale

Researching on changing competence needs triggered by Digitalization, Jennifer is especially interested in using digital technology to make Munich an even more livable city.
